

## Press Release

### **RedHill Biopharma Announces DDW 2018 Poster of Distinction on Positive Phase II Results with BEKINDA<sup>®</sup> for IBS-D**

**TEL-AVIV, Israel / RALEIGH, NC, March 26, 2018** RedHill Biopharma Ltd. (NASDAQ: RDHL) (Tel-Aviv Stock Exchange: RDHL) (“RedHill” or the “Company”), a specialty biopharmaceutical company primarily focused on late clinical-stage development and commercialization of proprietary drugs for gastrointestinal diseases and cancer, today announced the presentation of an abstract, selected as a Poster of Distinction, at Digestive Disease Week<sup>®</sup> (DDW) 2018 on Sunday, June 3, 2018, from 12:00 PM to 2:00 PM EDT, at Walter E. Washington Convention Center, Washington, DC.

The abstract<sup>1</sup> (number: 2908495), entitled ‘*Randomized, double-blind, placebo-controlled, Phase 2 trial of ondansetron 12 mg bimodal release tablets for diarrhea-predominant irritable bowel syndrome (IBS-D)*’, was rated in the top 10% of all American Gastroenterological Association (AGA) abstracts selected for poster presentation at DDW 2018. The poster will be presented by Terry F. Plasse MD, Medical Director at RedHill.

The abstract describes the positive results of the Phase II study with BEKINDA<sup>®</sup> (RHB-102)<sup>2</sup> 12 mg for IBS-D. The Phase II study with BEKINDA<sup>®</sup> 12 mg successfully met its primary endpoint, improving the primary efficacy outcome of stool consistency (per FDA guidance definition) by an absolute difference of 20.7% vs. placebo (p-value=0.036). Results from the BEKINDA<sup>®</sup> Phase II study suggest that they compare favorably with previously reported efficacy outcome values from studies of Xifaxan<sup>®</sup> (rifaximin) and Viberzi<sup>®</sup> (eluxadoline) across all three efficacy endpoints<sup>3</sup>. RedHill plans to meet with the FDA in the second quarter

---

<sup>1</sup> The abstract was authored by Terry Plasse, MD, Danielle Abramson, PhD, Gilead Raday, Reza Fathi, PhD and Ira Kalfus, MD from RedHill Biopharma; Gary Barton, MD from Arkansas Gastroenterology; Evelyne Davidson, MD from New Phase Research & Development and Louis Velez, MD from Applied Research Center of Arkansas.

<sup>2</sup> BEKINDA<sup>®</sup> (RHB-102) is an investigational new drug, not available for commercial distribution.

<sup>3</sup> For more details, see RedHill’s press releases dated October 3, 2017 and January 16, 2018. Xifaxan<sup>®</sup> (rifaximin) prescribing information: [www.accessdata.fda.gov/drugsatfda\\_docs/label/2010/0225541bl.pdf](http://www.accessdata.fda.gov/drugsatfda_docs/label/2010/0225541bl.pdf); Viberzi<sup>®</sup> (eluxadoline) prescribing information:

[www.accessdata.fda.gov/drugsatfda\\_docs/label/2015/206940s0001bl.pdf](http://www.accessdata.fda.gov/drugsatfda_docs/label/2015/206940s0001bl.pdf); Average absolute difference from reported Phase III studies; the theoretical comparison between the BEKINDA<sup>®</sup> 12 mg Phase II study results and reported data from studies of IBS-D-approved therapies serves as a general benchmark for the effect size observed with BEKINDA<sup>®</sup> 12 mg and should not be construed as a direct and/or equal comparison given that the studies

of 2018 to discuss the design for one or two pivotal Phase III studies with BEKINDA<sup>®</sup> 12 mg for IBS-D.

**About BEKINDA<sup>®</sup> (RHB-102):**

BEKINDA<sup>®</sup> is a proprietary, bimodal extended-release (24 hours) oral pill formulation of ondansetron, covered by several issued and pending patents and targets several gastrointestinal indications. A first Phase III clinical study with BEKINDA<sup>®</sup> 24 mg for the treatment of acute gastroenteritis and gastritis (the GUARD study) successfully met its primary endpoint. A Phase II study with BEKINDA<sup>®</sup> 12 mg for the treatment of diarrhea-predominant irritable bowel syndrome (IBS-D) successfully met its primary endpoint.

**About RedHill Biopharma Ltd.:**

RedHill Biopharma Ltd. (NASDAQ: RDHL) (Tel-Aviv Stock Exchange: RDHL) is a specialty biopharmaceutical company, primarily focused on the development and commercialization of late clinical-stage, proprietary drugs for the treatment of gastrointestinal diseases and cancer. RedHill commercializes and promotes three gastrointestinal products in the U.S.: **Donnatal<sup>®</sup>** - a prescription oral adjunctive drug used in the treatment of IBS and acute enterocolitis; **Esomeprazole Strontium Delayed-Release Capsules 49.3 mg** - a prescription proton pump inhibitor indicated for adults for the treatment of gastroesophageal reflux disease (GERD) and other gastrointestinal conditions; and **EnteraGam<sup>®</sup>** - a medical food intended for the dietary management, under medical supervision, of chronic diarrhea and loose stools. RedHill's key clinical-stage development programs include: (i) **TALICIA<sup>®</sup> (RHB-105)** for the treatment of *Helicobacter pylori* infection with an ongoing confirmatory Phase III study and positive results from a first Phase III study; (ii) **RHB-104** with an ongoing first Phase III study for Crohn's disease and a planned pivotal Phase III study for nontuberculous mycobacteria (NTM) infections; (iii) **BEKINDA<sup>®</sup> (RHB-102)** with positive results from a Phase III study for acute gastroenteritis and gastritis and positive results from a Phase II study for IBS-D; (iv) **YELIVA<sup>®</sup> (ABC294640)**, a first-in-class SK2 selective inhibitor, targeting multiple oncology, inflammatory and gastrointestinal indications, with an ongoing Phase IIa study for cholangiocarcinoma; (v) **RHB-106**, an encapsulated bowel preparation licensed to Salix Pharmaceuticals, Ltd. and (vi) **RHB-107 (formerly MESUPRON)**, a Phase II-stage first-in-class, serine protease inhibitor, targeting cancer and inflammatory gastrointestinal diseases.
